Christie, I know he's sent this to you, but just to re-slug as you suggested yesterday.

**Subject:** MEDIA REQUEST--Surface Water Levels

To the PIO:

My name is Adam Wojciechowski and I am a reporter with the Navajo Post.

I downloaded the spreadsheet that was just released concerning the surface water levels of the Animas River.

What I am looking for is if there were any water readings taken from the source at the Gold King Mine within the same parameters.

According to a press released from August 5, "EPA is taking the lead on efforts to contain the leak and flow from the mine is now controlled"

By "controlled" does this mean the the flow from the mine has stopped, or it is still leaking and is being diverted elsewhere?

Thanks for your time,

Adam Wojciechowski
